

Carbon law for farmers

The *Clean Energy Future* and what it means for you

Who is the EDO?

The *Clean Energy Plan*

- › 1. The emissions trading scheme
- › 2. Households
- › 3. Industry
- › 4. Clean energy
- › 5. Land sector and biodiversity

Emissions trading scheme

- Makes big companies pay for their pollution
- Puts a 'cap' on carbon emissions

Household assistance

...to offset the impact on consumers

Industry assistance

An aerial photograph of a large industrial complex, likely a power plant or refinery. The facility consists of several long, rectangular buildings with flat roofs, arranged in a row. Behind these buildings are several tall, cylindrical smokestacks. The surrounding area includes green fields, a road, and a body of water in the background. The overall scene is a mix of industrial infrastructure and natural landscape.

To help industries deal with the carbon price, and prepare for a low-pollution economy

A photograph of a wind farm at sunset. The sky is a mix of deep blue and orange, with wispy clouds. Several wind turbines are visible, their silhouettes dark against the bright light of the setting sun. The largest turbine is in the foreground on the left, and several smaller ones recede into the distance on the right.

**\$10 billion new
clean energy
investment
through an
independent
carbon bank**

Land sector and biodiversity

A wide-angle photograph of a golden wheat field stretching to the horizon. The sky is a deep blue with scattered white clouds and a few white contrails. The text is overlaid on the right side of the image.

**Carbon Farming
Initiative**

**Biodiversity Fund
(\$1 billion)**

Farms and fossil fuels

An aerial photograph showing a vast, flat landscape, likely a farm or a mining operation. The terrain is divided into a complex network of roads, paths, and fields, creating a grid-like pattern. The colors are muted, with shades of brown, tan, and grey, suggesting a dry or semi-arid environment. The overall appearance is one of intense land use and infrastructure.

What are your rights in relation to coal and coal-seam gas on your land?

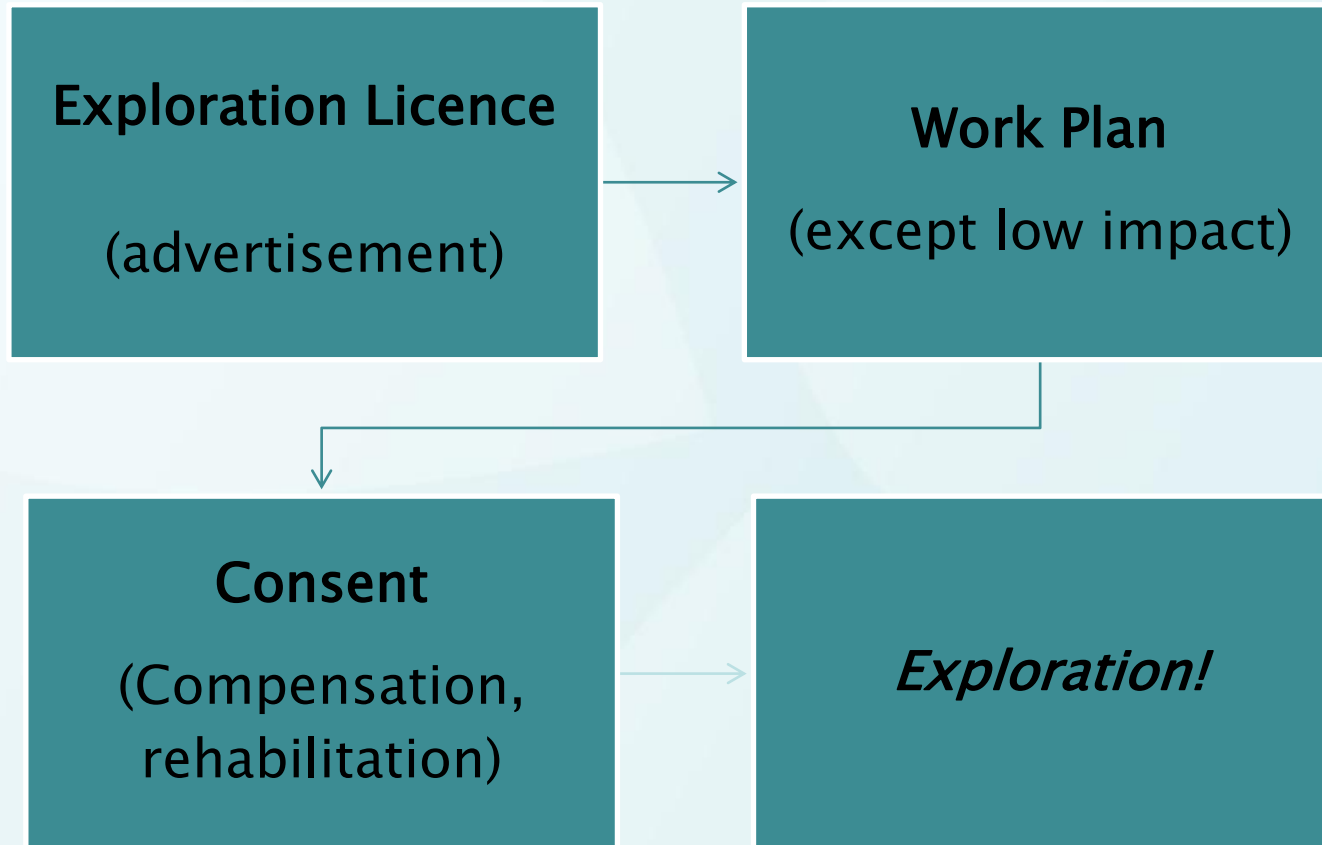

Things are changing...

How much of this do you own?

How is mining regulated in Victoria?

How is mining regulated in Victoria?

What are your rights?

1. Object to a licence

2. Agricultural land exemption

3. Planning approval

4. Lock the Gate
